Esperanza S. Rozas

Seattle, WA | erozas@uw.edu | www.linkedin.com/in/esperanza-r/ | www.github.com/ESR76

Summary

First year master's student in biostatistics with experience with engaging data visualizations and machine learning models. Interested in geospatial data analysis and tracking disparities in health across different local populations.

Education

M.S. IN BIOSTATISTICS | EXPECTED MARCH 2028 | UNIVERSITY OF WASHINGTON SCHOOL OF PUBLIC HEALTH

B.S. IN DATA SCIENCE | JUNE 2023 | UC SAN DIEGO & HALICIOĞLU DATA SCIENCE INSTITUTE

Work

ANALYTICS SYSTEMS ENGINEER & DATABASE ADMINISTRATOR | EPIC SYSTEMS | SEPTEMBER 2023 - JULY 2026

- Managed extract, transform, & load procedures into multiple SQL reporting databases per customer system.
- Investigated SQL import and extract performance through SQL query plan analysis and identified potential resolution paths for Epic Systems R&D, occasionally in collaboration with Microsoft support.
- Migrated analytics databases totaling over 200 TB in size and workflows from self-hosted solution to Epic Hosting for multi-state health organization over a 9-month project.
- Led team-wide initiatives for improved training and documentation of common workflows, and division-wide initiative for improved security posture surrounding third-party software installs.

DATA ANALYSIS INTERNSHIP | MEASURED WELLNESS | AUGUST 2022 - AUGUST 2023

- Examined Oura ring and Apple Health data to help create personalized health recommendations.
- Synced up health data from multiple health portals with varying time intervals to create more robust analyses.
- Performed comparisons of patients' sleep on days with non-quantifiable data, such as meditating that day.

RESIDENT ASSISTANT | UC SAN DIEGO | AUGUST 2021 - JUNE 2022, AUGUST 2022 - JUNE 2023

- Promoted safety and community for 90+ residents in their first, second, and third years.
- Planned 20+ individual events to connect with different residential groups throughout both years.
- Won a residential college award for Outstanding New Paraprofessional as a first-time RA.
- Coordinated 12 resident assistants and ensured adherence with university COVID-19 requirements to plan a Fall Festival with over 100 attendees.

Projects

PASSING AND TEAM SUCCESS IN SOCCER PROJECT | JANUARY - MAY 2022

- Conducted as part of the Data Science Student Society Winter 2022 Project Cohort.
- Cleaned and reformatted over 3 million rows of StatsBomb event data to analyze relationships between events.
- Created a multitude of visualizations to identify areas of interest as part of exploratory data analysis.
- Built an interactive demo in Streamlit for participants to visualize team location, shot, and passing chain data, along with a position-focused passing map for every player represented in the data.

DATAHACKS INTERMEDIATE TRACK PROJECT - SHARK TANK PITCHES | APRIL 9-10, 2022

- As part of a 24-hour Datathon, designed models and predictions whether a pitch on the TV show Shark Tank would result in a deal from one of the "Sharks." Used K-means clustering, word2vec, and TF-IDF algorithms
- Won an honorable mention for the project in the Intermediate track.

Tools

- Python (pandas, sklearn, seaborn)
- R, Java, D3.js
- GitHub, Jupyter, Docker, Streamlit
- T-SQL, PostgreSQL
- AWS, Dask, Spark

Concepts

- Data structures & algorithms
- Statistical modeling, hypothesis testing
- SQL database administration
- Supervised learning (k-nearest neighbors,
- decision trees, perceptron algorithm)
- Unsupervised learning (k-means clustering)

Interpersonal Skills

- Problem-Solving
- Collaboration
- Leadership
- Customer Service

Languages

Spanish (Intermediate), American Sign Language (Elementary)
